### **DETAILED ACTION**

1. This action is in response to applicant's amendment received on 04/04/07.

#### ***Claim Objections***

2. Claim 26 is objected to because of the following informalities: The examiner suggest to add "a" in line 13, before 'plane'; and in line 14, ", when the cutter means" after 'means'.

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1 and 32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification discloses an effective rotation of the cutting head relative to the handle of 120 degrees in one direction or 240 degrees in the other direction relative to the axis is not sufficient to one of ordinary skill in the art to make and use the invention. Applicant needs to illustrate in detail in the specification and drawings every angle that comprise the effective rotation and every direction claimed.

Art Unit: 3724

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1, 2, 19-21, 29-32 and 33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 32, it is not clear what “an effective rotation of the cutting head relative to the handle of 120 degrees in one direction or 240 degrees in the other direction relative to the axis” encompasses.

Claims 21 and 33, in line 4 “horizontal” is indefinite because it is not relative to any specific point.

Claim 29 is indefinite because it depends from a cancelled claim 25.

#### ***Allowable Subject Matter***

7. Claims 26-28 are allowed.

#### ***Response to Arguments***

8. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Uhl is cited to show a related device.
